

Clean water, pure air, renewed earth... through RPM®

join

Forrest Keeling's Fall Field Day

- plan a fail-proof project
- predict 95% or better survivability and reduced maintenance
- initiate renewable energy and green projects
- expect significant environmental benefits

Innovators of RPM Technology

FORREST KEELING
• NURSERY •

Fall Field
Day
Sept. 9

Save the Date

Participate in three **interactive panel discussions** to learn more about better green solutions and Forrest Keeling's innovative, patented plant production technology. RPM **grows trees faster throughout plant life** and is **scientifically proven to generate more than 2X more biomass** for significantly greater carbon sequestration, biofuel production and remediation.

- **Network** with others.
- **Enjoy** great, b-b-q lunch prepared by our local FFA.
- **Tour** sites that showcase RPM's superior vigor through provenance, improved techniques.

Agenda

- 8:00–8:45: Registration
- 9:00: Welcome, orientation and break into groups
- 9:15–10:45: *Tent Sessions*
- 11:00–12:30: *Tent Sessions*
- 12:30–1:15: Lunch and networking
- 1:30–3:00: *Tent Sessions*
- 3:15–4:45: *Tent Sessions*
- 5:00: Adjoin

Tent 1: Air and RPM

- Carbon sequestration and biofuel
- Environmental buffers
- Forests and clean air
- Heat islands, green roofs and energy conservation

Tent 2: Water and RPM

- Wetlands for environmental quality
- Stormwater management for communities
- Working with government: finding buy-in and funding
- Riparian buffers and gulf hypoxia

Tent 3: Earth and RPM

- Bioremediation, erosion control and low-maintenance landscapes
- Agroforestry and specialty nut and fruit crops
- Environmental insurance for crops

Tours and Demonstrations

- WRP (Wetland Reserve Program) planting
- RPM propagation and container production
- Lovelace Seed Orchard
- Walk-A-Way System

Visit the home page link on our website www.ForrestKeeling.com to register and learn more about topics and speakers. *There is no charge to attend, however, space is limited.*
